What is the Google AI Professional Certificate?

The Google AI Professional Certificate is an online programme designed to help learners build practical AI fluency for work. It focuses on using AI confidently, responsibly and productively across common workplace tasks such as planning, research, writing, content creation, data analysis and app building.

What will I learn?

Learners will practise giving AI clear instructions, using AI responsibly, applying AI to workplace tasks, and building practical solutions. Learners will create 20+ hands-on activities/solutions that can be used at work.

Will I receive a certificate?

Yes, learners who complete the programme can earn a shareable Google career certificate. The certificate can be added to LinkedIn, a CV or shared on social media.

Who is the certificate for?

It is suitable for beginners. No prior experience is required. That makes it appropriate for learners who are new to AI, as well as those who have used tools like ChatGPT or Gemini informally and want a more structured approach.

BOOKING INFORMATION

Enrolment can be done online or in person. Course costs need to be paid before your chosen course begins. For more information on courses and concessions, choose one of the following ways:

- > Visit groundworklearningcentre.com
- > Call us on 07730 765564
